

6th October 2009

Invitation ECONOMIC FORUM TURKEY

**in the framework of the Energy Efficiency Export Initiative
on behalf of the German Federal Ministry of Economics and Technology**

on 16th December 2009 in Berlin

on the occasion of a business delegation visit from Turkey

NUMOV is organising an Economic Forum TURKEY on the occasion of a business delegation from the Republic of Turkey in the framework of the Energy Efficiency Export Initiative and on behalf of the Federal Ministry of Economics and Technology.

The expansion of the industry and the rising energy consumption of private households force Turkey into new investments in energy production. According to estimates of the energy ministry, about 130 billion dollars will have to be invested until 2020. The enormous potential of Turkey with regard to the energy sector is evident in the huge number of energy-related projects.

The heavy demand for sustainable, energy-efficient technologies and know-how provides German manufacturers and consulting companies with good sales and cooperation opportunities, considering the leading role of Germany in these sectors. The conference will inform medium-sized companies on the market potential of Turkey and will point out opportunities and fields of activity to participating business representatives. The conference will comprise presentations by expert speakers from Germany and Turkey. The contacts and cooperation exchange provides participants with the opportunity to establish and improve contacts with conference participants from the Republic of Turkey.

The Economic Forum TURKEY is free of charge and will be held in English.
