

Economic Forum ARAB COUNTRIES

in the Framework of the Energy Efficiency Export Initiative

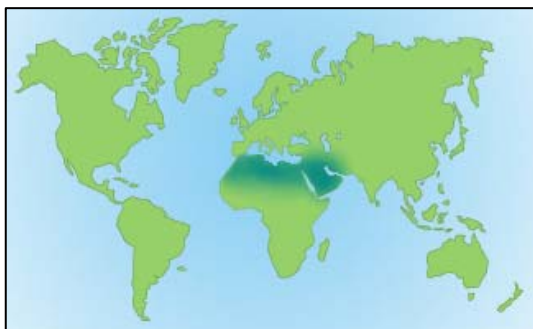

on behalf of the Federal Ministry of Economics and Technology

on 20th April 2010 in Hanover

on the occasion of a business delegation from the ARAB COUNTRIES

NUMOV, the German Near and Middle East Association, will organize an **Economic Forum ARAB COUNTRIES** in the framework of the Energy Efficiency Export Initiative on behalf of the German Federal Ministry of Economics and Technology.

In the last years, the Arab countries have gained in importance for German companies. With a volume of EUR 14 bn until July 2009, German exports to the Arab countries continue to be on a sound level. With economic reforms on the way in various countries, chances to improve economic ties have risen. The advancing industrialisation and the expansion of the service sectors in these countries will lead to an increase in energy consumption.

Predictions of a significant population growth in the countries of the region between today and 2050 will unquestionably have significant effects on the energy consumption in these countries.

As a result, initiatives are emerging within the Arab countries to equip existing industries with energy-saving technologies.

The Economic Forum ARAB COUNTRIES is free of charge and will be held in English.
