

8th March 2010

**INVITATION**

# **GERMAN - IRAQI Business Forum**

**on the occasion of a business delegation  
from the Republic of Iraq**

**on behalf of the  
German Federal Ministry of Economics and Trade**

**on 21<sup>st</sup> April 2010 at the Fair BAUMA 2010 in Munich**

NUMOV, the German Near and Middle East Business Association organizes on behalf of the German Federal Ministry of Economics and Technology a business delegation from Iraq in the sectors of engine construction, machinery supply, construction industry and logistics to Munich.

The recent development of the Iraqi economy is positive and continuously growing (estimates for 2009: +4.5%), oil production has reached the pre-war level of ca. 2.5m bpd and is expected to rise significantly in the next years. Especially in the infrastructure sector within the construction and logistics industry, there is much demand for investment. Moreover, there is significant demand in Iraq for modern machineries and equipment. Besides the ongoing expansion of the regional infrastructure (highways, bridges), the installation of public transport systems will become more and more important to meet the demand of the growing population. With the improvement of the security situation, the Iraqi government intends to enhance the general living conditions. To reach this goal, investments of USD 350-400 bn are needed. In this regard, German technologies and German know-how offer significant business opportunities.

The conference will be in English and is free of charge.
