

5th July 2010

INVITATION

Saudi-German Conference on Solar Industry

in the framework of the **Renewable Energies Export Initiative**
on behalf of the **German Federal Ministry of Economics and Technology**
on 3rd August 2010 in Magdeburg*
on the occasion of a business delegation from **SAUDI ARABIA**

NUMOV will organize in the framework of the Renewable Energies Export Initiative on behalf of the German Federal Ministry of Economics and Technology a conference on solar industry in Saudi Arabia on 3rd August 2010 in Magdeburg.

The Kingdom of Saudi Arabia, one of the oil richest nations in the world, is facing both significant population growth and growing demand for electricity, at a rate of 7-10% a year. By 2020, Saudi Arabia thus aims to expand energy production capacities by 29,000 MW. This trend is coupled with a move towards energy diversification in Saudi Arabia, especially in the field of renewable energy.

Saudi Arabia plans to invest around US\$ 120bn over the next 25 years in the energy sector, with a special focus on solar energy for both domestic and export use.

Saudi Arabia provides excellent conditions for the extraction of solar energy through photovoltaic, solar heat and concentrated solar power (CSP) technologies, as the Kingdom only experiences about 10 days of rain a year and in the summer can typically produce up to 970 trillion kWh of energy in the form of sunlight within 24 hrs.

* The location will be send with the confirmation of the registration.
The conference will be in English and is free of charge.
